

Remote Terminal Unit (RTU)

Features

One Year data internal storage capability

Onsite back up facility to pen drive / laptop.

LAN

User programmable logging interval of the measured parameters.

System Parameters configurable through user interface

4G Dual SIM

Application Areas

Energy Meter Data Collection

Customized Application

Product Description

A RTU is a rugged, microprocessor based device designed for remote monitoring, control, and data acquisition in substation, Industrial and infrastructure projects. RTUs are widely used to collect data from field sensors and equipment, process it locally, and transmit it reliably to a central control system through 4G network.

Analogics RTU is built for harsh and unmanned locations, RTUs provide dependable operations across utilities in Power Generation, Transmission / Distribution, Substations and Feeder Automation, Renewable Energy, Remote Asset Management etc., applications with 4G Dual SIM.

Technical Specifications

CPU	: 900 mHz – ARM
Memory	: RAM 512MB FLASH 4GB
Meter Data	: Meter data reading through Ethernet / RS485
Communication	: 4G Modem with Dual SIM
Real-Time Clock	: Display Available & Synchronize RTC with Server
Ports	: 1. Ethernet – 4 - 10/100 2. Serial – 1-RS232, 1 - 485 3. USB – 1-Host, 1 - Device 4. RTC - with Backup
Power	: 63/110 / 230V AC (24V DC Optional)
Mounting	: Din Rail Mounting (Optional)
Dimensions	: L= 190mm x W = 160mm x H = 50mm
Operational Temperature	: 0° C to 60°C
Operating Humidity	: 0-95% RH
Protocol	: MODBUS Protocol Supported by IEC 101/104, TCP/IP
Certifications	: IEC 61000-4-2, 3, 4, 6, 8 & 10 : IEC 60068-2-1, 2, 6, 14 & 27

CORPORATE OFFICE & PRODUCTION UNIT-1

#9/10, Road No.6,
Nacharam Industrial Estate,
Hyderabad-500076
Telangana, INDIA
Tel: (+91)-04-67355000
